The new patent-pending Suncall America MPO Internal Shutter Adapters offer a safer, simplified approach to MPO connections and have space saving benefits, according to the company. With

safety in mind, the internal shutters enable instant laser detection and reduce the risk of laser exposure. The internal shutters also deliver added protection to the line by providing a maximum safeguard from dust and debris while protecting the ferrule. The internal shutters eliminate the need for dust plugs as well.

Judge's comment: "An elegant solution for a common challenge, this internal shutter adapter provides added peace of mind for fiber-optic system administrators."
